Professional Summary

An experienced and highly motivated frontend engineer with extensive industry experience obtained from developing for multiple clients.

Experience

Freelance

Frontend Developer

April 2021 - Current

- Worked independently to design and develop websites for multiple clients
- Created search engine optimised application using HTML5, CSS3 (SASS), Javascript ES6, VueJS and ReactJS
- Communicated with stakeholders to convert business requirements into high quality solutions

Freelance

Programming Tutor

September 2021 - Current

- Understanding different teaching methods and strategies which allow me to tailor my approach to meet individual student needs.
- Making the learning process more effective and engaging.
- Designing and organizing lesson plans and coding exercises is essential to ensure a structured and comprehensive learning experience for my students.
- Efficient time management skills which enable me to schedule tutoring sessions effectively and meet my students' expectations.
- Staying updated with the latest trends and advancements in programming which not only enhance my own skills but also enable me to provide valuable insights to my students.

Projects

- Develop a responsive website using HTML5, CSS, and JavaScript that adapts seamlessly to different screen sizes and devices. Showcase my ability to implement media queries and flexible layouts.
- Build an e-commerce website with features like product listing, search functionality, shopping cart, and checkout process. Demonstrate my skills in Frontend frameworks such as React, Angular and Vue.js for dynamic user interfaces.
- Create a personal portfolio website that showcase my projects, skills, and work experience. Use creative design elements and animations to make my portfolio stand out.
